
Stage-2 probe: common A1/F1 maturation is a narrow window, not a monotone knob
the rise is followed by a cliff, not a plateau
bit2 threshold crossings
A1/F1 common maturation (min)
mRNA 0.5 min
mRNA 1 min
mRNA 2 min
mRNA 3 min
mRNA 4 min
mRNA 6 min
mRNA 8 min
needed: 14 = bit1 reverse events
the collapse sits just past the RDF2 decay time
median g1 window width (h)
RDF2 decay time 1.25 h
the RDF2 pool that reverse recombination needs
median RDF2 (a.u.)
